

AGISTAR OXR T100

Lightweight Electric Propeller (Remote Control)

Single Propeller Unit

- ★ Rated power 3600W
- ★ 48V~60V DC drive
- ★ Applicable for most 48V~60V lithium batteries
- ★ Size: 480*110*490mm (±20mm)
- ★ Weight: 18kg
- ★ Propulsion: Jet pump structure;
metal construction and aluminum alloy shell
- ★ Brushless inductive DC motor
- ★ Three-blade stainless steel jet pump paddle
- ★ Propeller waterproof level: IP67
- ★ Waterproof level of the remote control: IP65
- ★ Open for adding 4G module

Features

- ★ Depending on hull size, speed, loading weight, and other actual needs, you can select 2 to 4 units at once.
- ★ The units can automatically identify each other and coordinate autonomously to achieve the optimal propulsion mode.

Advantages compared to oiled outboard motors

- ★ Quick installation and removal in 3 minutes
- ★ It has a shallow draft, making it suitable for shallow waters, urban flooding, and other complex water conditions
- ★ Ducted propellers prevent injuries to people and help avoid entanglement with floating objects
- ★ It can be controlled remotely when navigating through dangerous waters
- ★ Extremely low noise
- ★ Environmentally friendly, producing no exhaust emissions and causing no oil pollution in water
- ★ Simple to store and easy to maintain
